PROFILE

Angelic is an 8th-semester Information Systems student at Sampoerna University, concurrently pursuing Applied Computing at the University of Arizona. She has a strong interest in web development, data analysis, and system architecture. Previously interned at PT Mesin Isuzu Indonesia as an IT Intern, contributing as a full-stack developer using the CodeIgniter framework.

EDUCATION

Sampoerna University Aug 2021 – May 2025 (Expected)
double degree with University of Arizona
Bachelor of Applied Science (BASc)
Major in Information Systems (GPA 3.81)
- Full 100% Scholarship Awardee from Sampoerna University (SPARK Scholarship)
- Achieved Dean's List recognition for Fall 2023/2024, Spring 2022/2023, Fall 2022/2023, Spring 2021/2022
- Related courses: Software Engineering, Data Analysis and Visualization, and Computational Thinking

Broward College Aug 2021 – May 2023
Credit Transfer Program
General Education

WORK EXPERIENCE

IT Intern
PT Mesin Isuzu Indonesia Jun 2024 – Aug 2024
- Developed a web-based Kaizen Management System using CodeIgniter for the HR department to replace paper-based processes and improve efficiency
- Developed key features such as multi-level approval workflows, form submission, and document export/import functionalities
- Created user guideline to facilitate system adoption across the organization

Data Engineer Project-Based Virtual Internship
ID/X Partners x Rakamin Academy Apr 2024
- Successfully implemented data modeling, data integration, and SQL operations for the final project
- Utilized Talend Open Studio to perform ETL processes on a source database, transform data into star schema with fact and dimension tables in SQL Server Management Studio

Discrete Mathematics Tutor
Sampoerna University Aug 2023 – Dec 2023
- Tutored a cohort of 8 sophomore students, providing guidance to aid comprehension and problem-solving in discrete mathematics
- Conducted both group and individual tutoring sessions to accommodate diverse learning needs of students; contributed to a 35% average score increase among students and a 30% decrease in retest rates

PROJECTS

Named Entity Recognition for Wildfire Incidents
Final project for Fundamentals of Database Management Systems
- Extracted online news regarding California wildfires into plain text using BeautifulSoup library in Python
- Implemented spaCy to automate the parsing and recognition of named entities in the unstructured database for data processing and analysis
- Design and implement a structured database to store wildfire incident data, including defining key constraints for

database integrity in MySQL

Budget Tracker Web App

Final project for Software Engineering

- Conceptualized the design and developed the wireframes of the budget tracker web app using Figma
- Collaborated with team members in defining the system's functionalities and requirements
- Played a key role to document the System Requirements Specification (SRS), including system architecture, system evolution, and use case diagrams and specifications.

VOLUNTEER EXPERIENCE

Kongres Mahasiswa (KOSMA) BEM KM FET 2022

Presidium II

May 2022

- Efficiently managed documents adjustments in real-time during online session, aligning with participants' dialogue to maintain pace and efficiency
- Implemented feedback from the organization's members promptly to maintain document accuracy and meet organizational standards
- Coordinated the compilation and timely submission of finalized documents to the organizational board, demonstrating attention to detail

TRAINING & CERTIFICATION

- Microsoft Office (Excel 2016) certified by Microsoft (2021)
- Intro to Data Analytics certified by RevoU (2023)
- Frontend – Javascript by MySkill (2025)
- Python Lanjutan by Skilvul (2025)
- Algorithm & Data Structures with Python (2025)

SKILLS

- Technical: CodeIgniter 3, PHP, HTML, CSS, JavaScript, Python, MySQL, SQL Server Management Studio, Talend Open Studio, Microsoft Office (Word, Excel, Power Point), Figma, Wireshark
- Languages: English (Advanced), Chinese (Basic)
